

A photograph of a city skyline at night, with buildings illuminated and their lights reflected in a body of water. The sky is a deep blue with some light clouds. A blue rectangular box is overlaid on the right side of the image, containing the title text.

Daikin Global Partnership Solutions

Achieve your HVAC-R goals with
Daikin Global Partnership Solutions (GPS)

Daikin GPS

guiding you every step of the way

Daikin is a leader in the HVAC-R industry with over 90 years of experience developing high-quality and energy-efficient climate solutions for people and businesses worldwide.

We're committed to assisting every customer in finding the perfect HVAC-R solution for their needs - no matter the sector or project size. That's why we founded Daikin Global Partnership Solutions (GPS) at our EMEA HQ in Brussels.

Daikin GPS focuses on building long-term relationships with international customers by offering a one-stop shop for exceptional products, services and support. Daikin's solutions are the most advanced in the HVAC-R industry because of its commitment to innovation and the environment. With Daikin GPS, you'll benefit from a team of experts who understand your actual needs and provide you with technical and operational guidance to reduce your workload and give you absolute peace of mind.

The clients we serve

We're devoted to bring absolute convenience to our clients. Throughout the years, we've developed strong relationships with companies from a variety of sectors. Discover how Daikin GPS provides innovative and sustainable HVAC-R solutions and offers support from a team of trusted professionals.

Hospitality and leisure

Our GPS team helps customers who want to expand internationally by standardising equipment and reducing communication lines.

Manufacturing and pharmaceutical

Our GPS team helps manufacturers who are looking for a reliable partner for all their HVAC-R needs. We deliver customised solutions that meet your specific requirements, increase plant efficiency, reduce refrigerants with a high GWP, optimise system operations and reducing your ecological footprint.

Property development

We help property developers create a comfortable and safe indoor environment for their clients by reducing equipment failure and increasing their green building scores while keeping an eye on the schedule and budget.

Retail

We help retailers with their store development by standardising the HVAC-R solutions, reducing the store's environmental footprint and increasing their customers' comfort.

Logistics & distribution

Our GPS team helps logistics & distribution companies who want to ensure the quality of the products they transport and store by maximising equipment uptime and offering a one-stop shop solution.

How it works

Here's how Daikin GPS works at a glance

Step 1: Your needs

The process begins with an introduction meeting to get to know you and your business. We'll take this opportunity to learn about your specific challenges and needs.

Step 2: Our solution

Based on the intake meeting, we'll then prepare a concrete offer that covers all your needs and provides solutions for any challenges you face on a technical and operational level.

Step 3: Roll-out

After validating the offer, we'll roll out the agreement to our regional offices and set up kick-off meetings with your local team and Daikin to ensure what we agreed upon is put into practice. You will be able to rely on a worldwide network of colleagues and partners in all segments and aspects of our business. Always available to help you out.

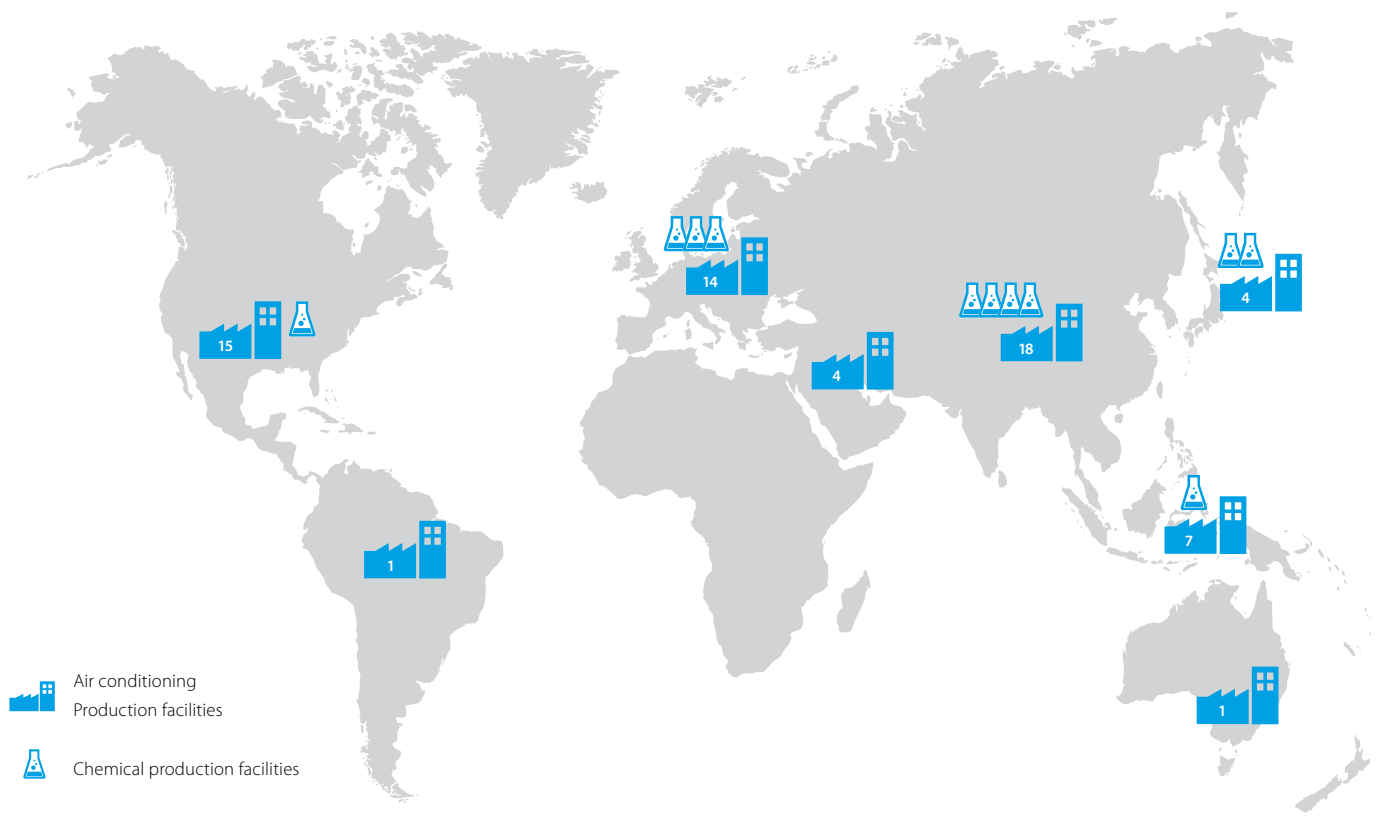

Step 4: Partnership

We'll serve as your go-to partner by providing a one-stop shop of products, services and support. Gain peace of mind knowing your HVAC-R needs are taken care of, while we continue looking for further improvements and innovations.

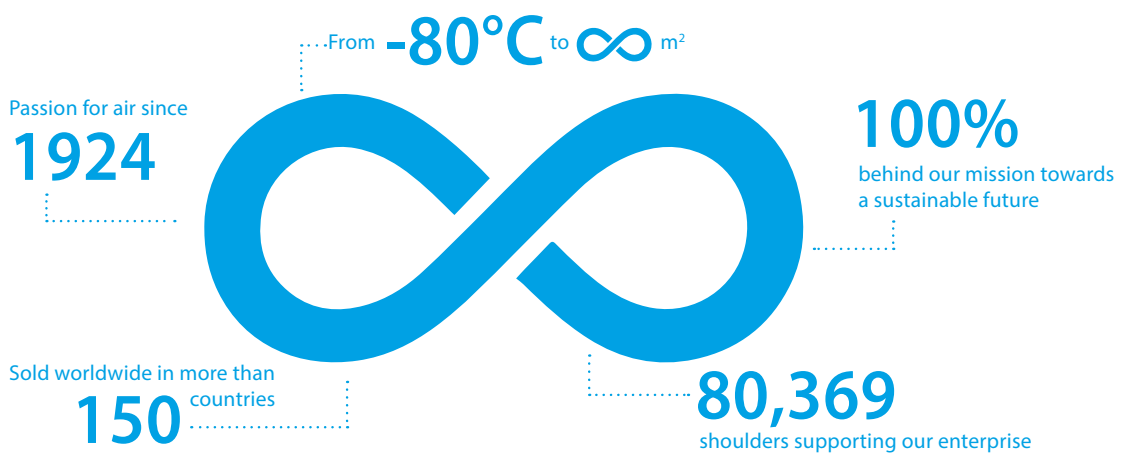

A world leader in climate solutions

We have a worldwide presence in over 150 countries, which allows us to provide the best service and support in sales and manufacturing. It also means we're able to meet the local requirements and desires for the solutions we provide.

About Daikin Europe N.V.

In 1973, Daikin Industries Ltd. established Daikin Europe N.V. to tailor the Daikin products to the specific needs and requirements of Europe, The Middle East, Russia and Africa (EMEA). With the help of our extended network of over 12,670 employees in 50 EMEA countries, we can provide local support to our customers, wherever they may be.

Daikin produces a highly energy efficient and a comprehensive range of quality indoor climate control products and systems for commercial, industrial and residential applications. Our product portfolio consists of heating, ventilation, air conditioning, control systems, applied systems and refrigeration products.

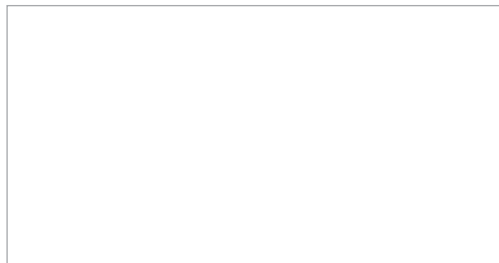

Leading the way in HVAC-R

We consider environmental sustainability as one of our fundamental values, and it's part of everything we do. Focusing on the environment led us to the frontlines of refrigerant development, pioneer net-zero energy buildings and become a significant contributor to marketing-leading HVAC-R technologies.
