

Daikin Europe, a sustainable industry leader

Our Mission

Air is essential to our existence. It has always been Daikin's mission to make the air we breathe and live in the best possible air. Our innovative products and solutions are designed to improve people's health and well-being and to reduce the environmental impact of heating and cooling. Today we are using our advanced technology to become a driving force in the transition to a carbon-neutral society.

About us

Daikin is the world's leading manufacturer of heating, cooling, ventilation and refrigeration equipment. We provide solutions for healthy indoor air and help customers reach their climate ambitions with heat pumps and smart energy systems. We offer solutions based on more than 90 years of experience in innovative technologies, pioneering product developments, top quality and versatile integrated solutions. Today, we are the only company in the world to deliver each step in the process of delivering customer value – from product and solution design to development, production and services related to cooling, heating, ventilation and freezing solutions. We serve customers globally, from residential to industrial applications, across all climate regions.

Daikin Europe N.V. is 100% subsidiary of Daikin Industries Ltd.
